

PLASTIC CRATES

foldable containers

PRODUCT CHARACTERISTICS

- ergonomic shaped hand holes provide best possible carrying qualities
- thanks to a shell handle the folded container is easier to handle
- lowered label areas on all four sides protect adhesive labels from being mechanically damaged
- the foldable container can be completed with a lid from the UNISTA-line
- it is possible to order the box in a bicolored version
- the Ringoplast foldable containers are made without metal pins which make them a 100% recyclable
- we offer the containers with open and grilled hand holes; the grilled hand holes can prevent items from falling out of the container.
